## Results Analysis

### Q1

What is the overall area (approx ha) of land owned or managed that you have direct control and/or influence over?

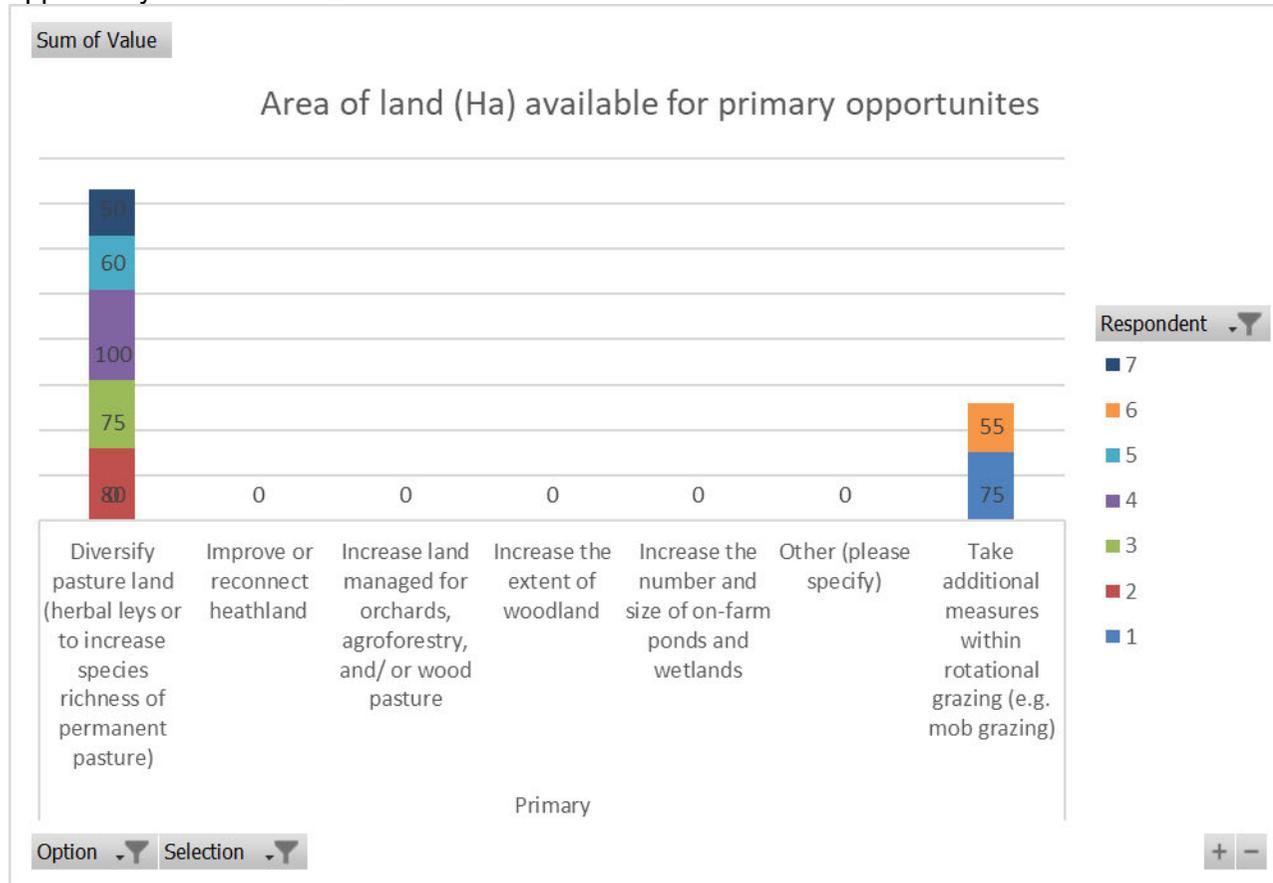

Respondent	
1	250
2	55
3	103
4	250
5	250
6	120
7	160
Total	1188
Average	169.71

Largest farm is 250 ha (three respondents) with a total area of 1188 and average farm size of 169.71 ha.

## Farm Opportunities Scoping

### Q2 & 5

For land that you have a direct ownership/influence over, what is the primary opportunity that you have identified? (select from the dropdown menu or identify 'other') and Q5 Please tell us the total area in ha (or length in m for Cornish hedges) that you could achieve for your primary opportunity identified in Question 2

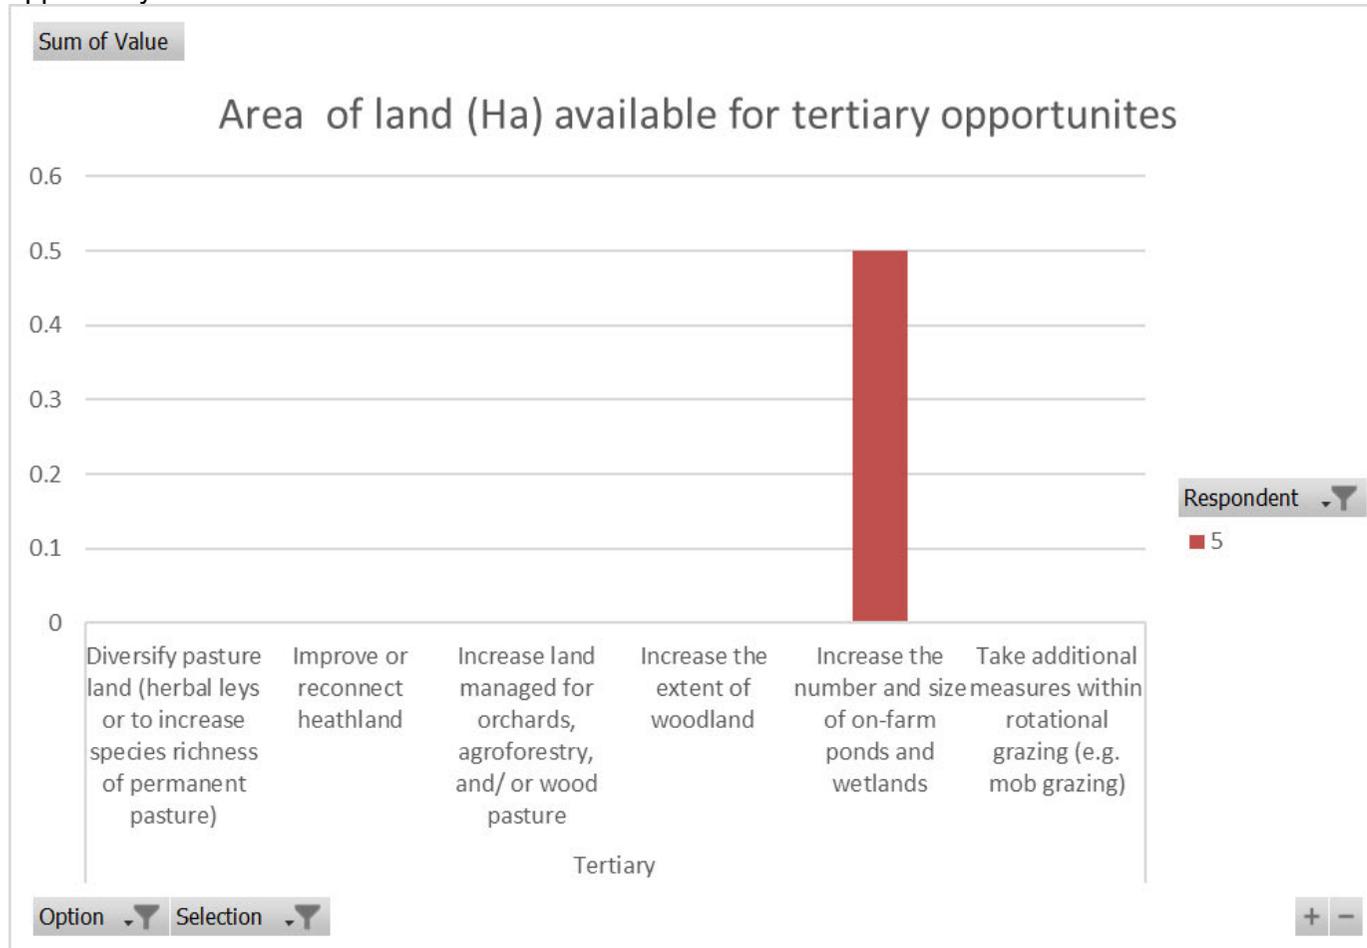

Q3 & 6

For land that you have a direct ownership/influence over, what is the secondary opportunity that you have identified? (select from the dropdown menu or identify 'other') and Q6 Please tell us the total area in ha (or length in m for Cornish hedges) that you could achieve for your secondary opportunity identified in Question 3

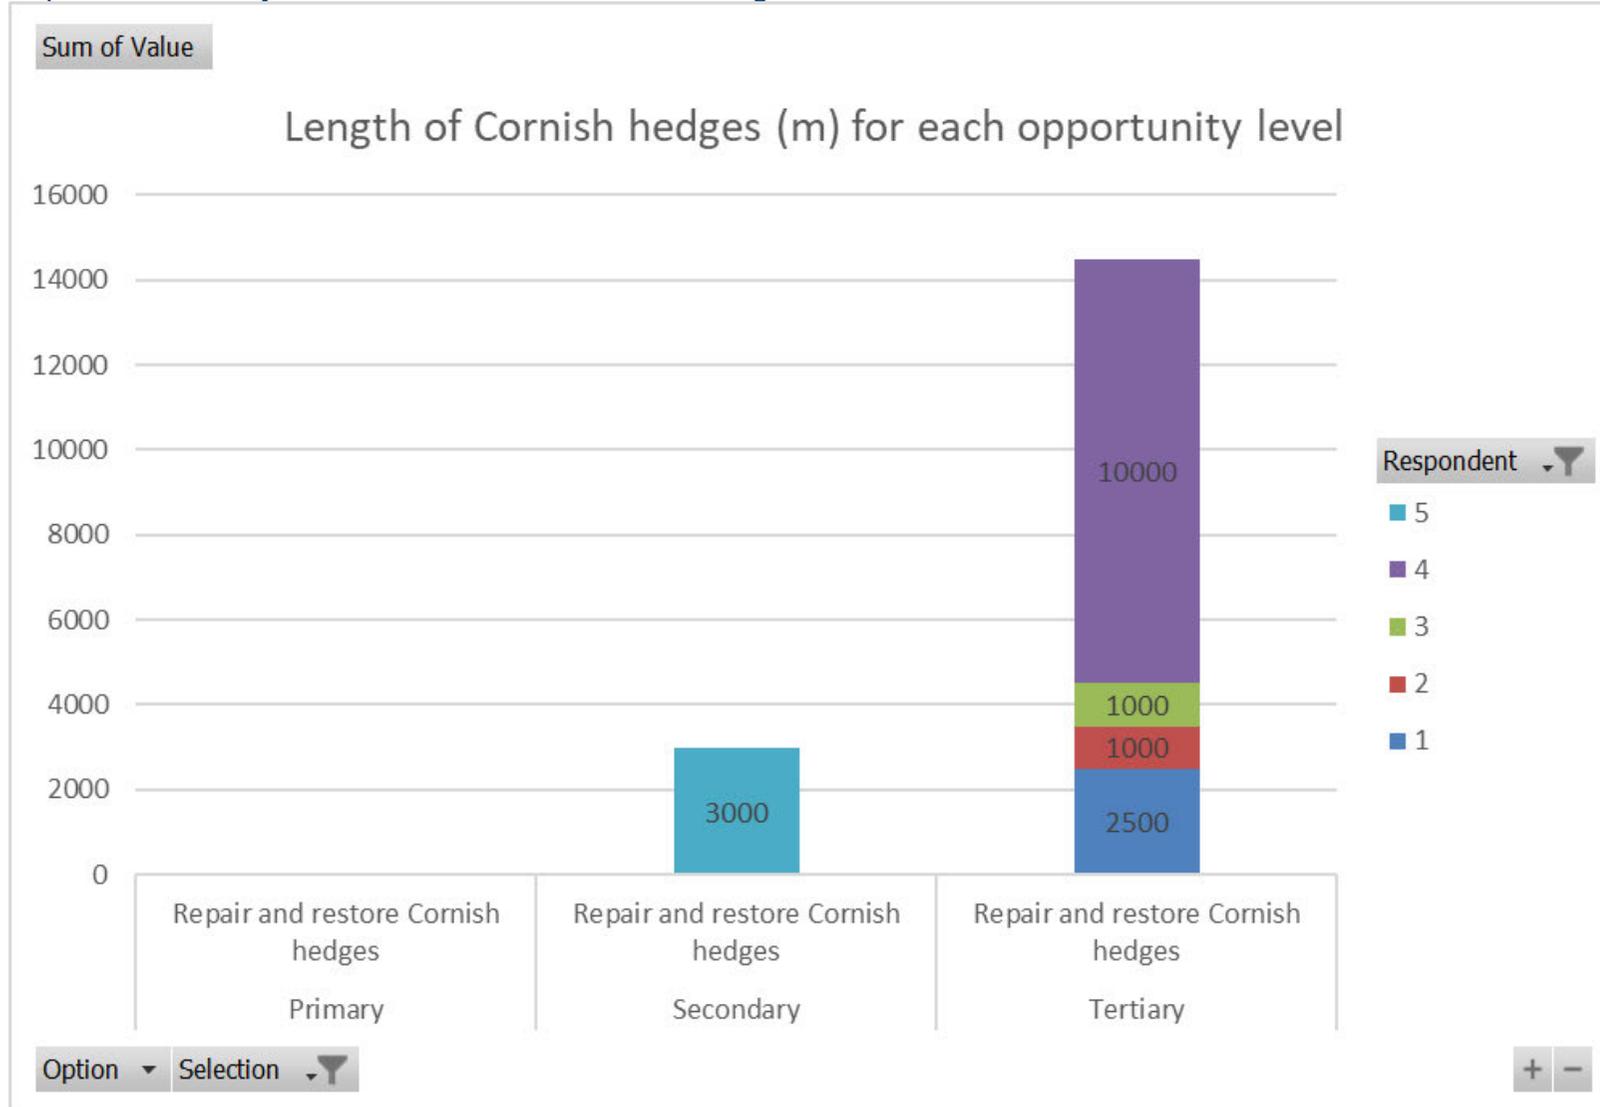

Q4 & 7

For land that you have a direct ownership/influence over, what is the tertiary opportunity that you have identified? (select from the dropdown menu or identify 'other') and, Q7 Please tell us the total area in ha (or length in m for Cornish hedges) that you could achieve for your tertiary opportunity identified in Question 4

Options chosen for the tertiary opportunities were limited for area based approaches, since almost all respondents chose Cornish hedges.

Specific summary for the restoration of Cornish hedges

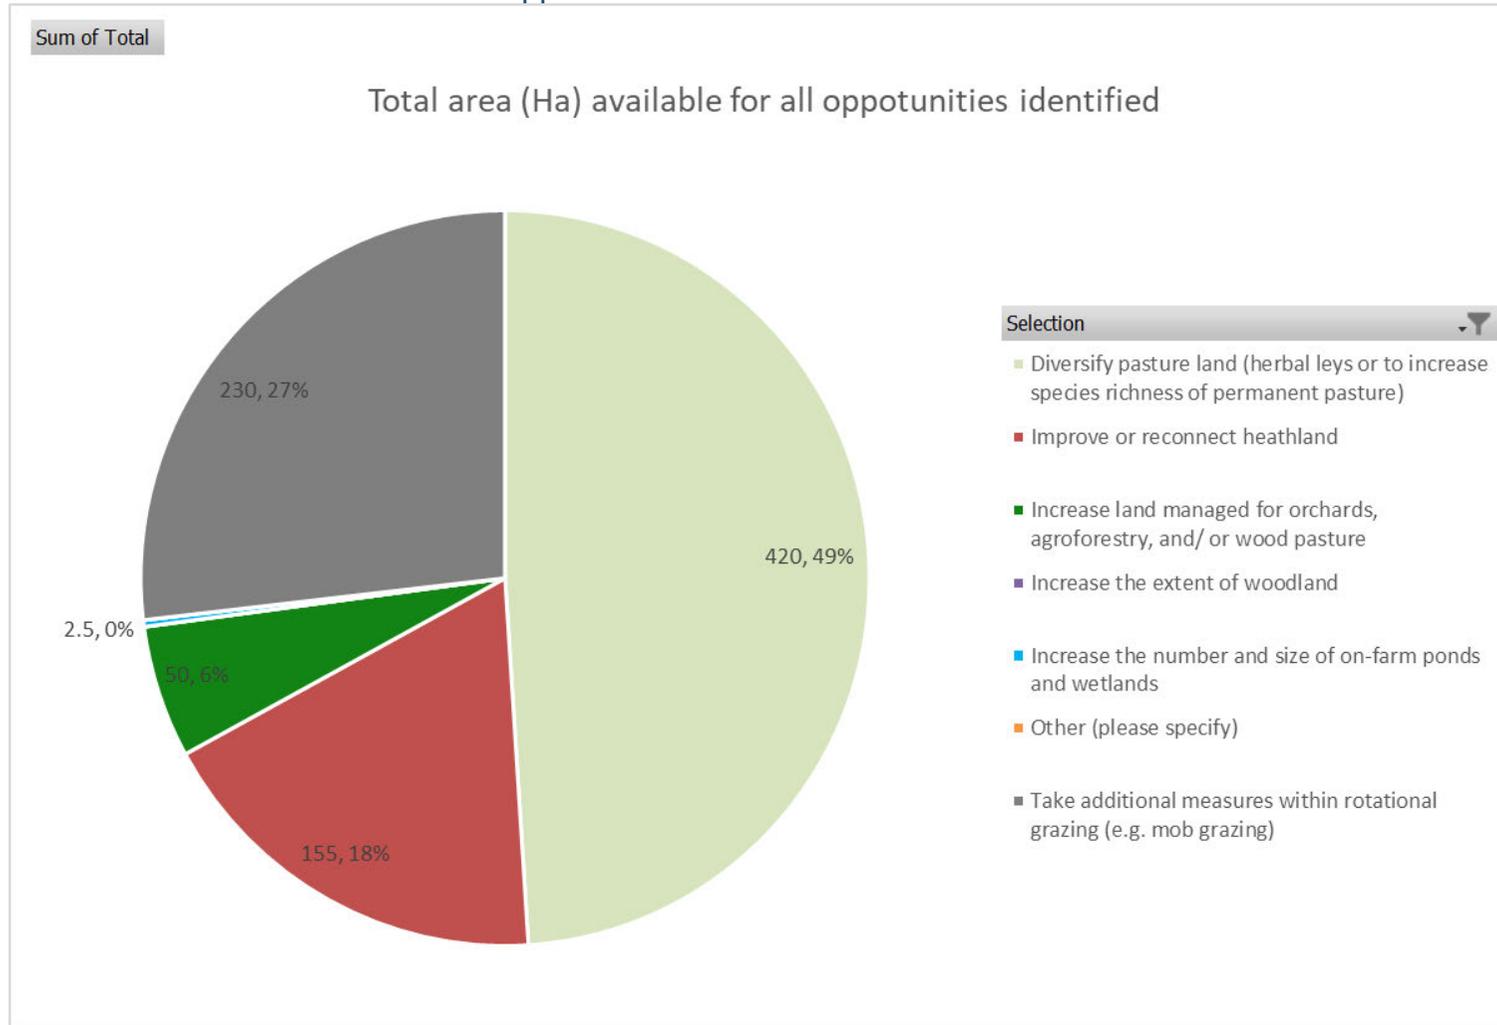

Q8

Is there overlap (in ha or m) between any of the opportunities identified? (please describe)

Overlaps identified were between increasing the diversity of permanent pasture and wood pasture and the development of herbal ley pastures and mob grazing approaches. i.e. Mob grazing can be carried out on herbal ley pastures. There was also perceived overlap between in field measures such as mob grazing and measures to restore Cornish hedges

Total area of land available for all opportunities identified

NB Although 'Other' reads as 0 on the chart above, one 'other suggestion was submitted by respondent #6, which was the 'plant trees on Cornish hedges'. The respondent was not specific on how many trees or length of hedge, although stated average field size to be 5 acres.

## Farm Opportunities Scoping

### Raw data table

Option	Selection	1	2	3	4	5	6	7	Total
Primary	Repair and restore Cornish hedges								0.0
Primary	Increase the number and size of on-farm ponds and wetlands								0.0
Primary	Diversify pasture land (herbal leys or to increase species richness of permanent pasture)		80.0	75.0	100.0	60.0		50.0	365.0
Primary	Increase the extent of woodland								0.0
Primary	Increase land managed for orchards, agroforestry, and/ or wood pasture								0.0
Primary	Improve or reconnect heathland								0.0
Primary	Take additional measures within rotational grazing (e.g. mob grazing)	75.0					55.0		130.0
Primary	Other (please specify)								0.0
Secondary	Repair and restore Cornish hedges					3000.0			3000.0
Secondary	Increase the number and size of on-farm ponds and wetlands	2.0							2.0
Secondary	Diversify pasture land (herbal leys or to increase species richness of permanent pasture)						55.0		55.0
Secondary	Increase the extent of woodland								0.0
Secondary	Increase land managed for orchards, agroforestry, and/ or wood pasture			50.0					50.0
Secondary	Improve or reconnect heathland				150.0			5.0	155.0
Secondary	Take additional measures within rotational grazing (e.g. mob grazing)		100.0						100.0
Secondary	Other (please specify)								0.0
Tertiary	Repair and restore Cornish hedges	2500.0	1000.0	1000.0	10000.0				14500.0
Tertiary	Increase the number and size of on-farm ponds and wetlands	0.0				0.5			0.5
Tertiary	Diversify pasture land (herbal leys or to increase species richness of permanent pasture)	0.0							0.0
Tertiary	Increase the extent of woodland	0.0							0.0
Tertiary	Increase land managed for orchards, agroforestry, and/ or wood pasture	0.0							0.0
Tertiary	Improve or reconnect heathland	0.0							0.0
Tertiary	Take additional measures within rotational grazing (e.g. mob grazing)	0.0							0.0

# Individual responses

Take additional measures within rotational grazing(e.g. mob grazing)
